My Earth Day 400 Word Essay

I love Mother Nature. You can't beat nature, except in Minecraft where you can punch a tree! Nature is all around us. I remembered when I used to just go outside on my bike and go to my cousin's complex all the time. But now people leave their garbage on the ground, now I can't bike there. We can't afford to leave our stuff on the ground! I know you're thinking, "Why can't people just throw their stuff away?" Well I don't know. I know some people in school who sits right NEXT to the garbage can but they ask their friends 10 feet away from them if they can throw their garbage out! What sense does that make? None!

People are killing nature! Stop chopping down trees! Homework is killing trees! It needs to be stopped! My bad, maybe I exaggerated. It just makes me so mad that so much people don't seem to care about nature. Why can't we all recycle? Oh wait, we can! You know that blue bin that has that triangle shaped object made of arrows? Yup, that one, that's called a recycling bin. You put paper, plastic, and glass in it then we can make lot's of fun thing from it. Yo-Yo's are made of plastic, so that's cool.

When God said "Let there be light!" I don't recall him saying "Sure, put your crap on MY grass! MY sidewalk!" Do you recall him saying that? No? Okay then, moving on. Let's review what we learned from this. One, don't ask your friends to recycle for you. get your behind up and do it yourself! Two, recycle! I know may sound weird, you're like "C'mon folk, you expect me to recycle my stuff for nothing man?" Remember, it's not for nothing man. Lastly, don't throw your stuff in my neighborhood please. That would do a huge favor for the Earth and everyone on it.

So, always remember to recycle your stuff away. It's not hard, even though it took me a month to clean my room. I would like to thank you for reading this. If you don't like what I said, at least recycle this paper please, thank you.
